

Newsletter Nr 16 ---- WESTERN LINK EDUCATIONAL COMPLEX ---- August 2015

Flashback:

Welec now has finished four full school years. The average number of students was 400. The course was quite large by relocation or transfer to a cheaper (public) school. In the latter case, our former students turned to belong to the best of the new school, because of our good education. Welec is also the only school in the wider area, where only English is spoken. This gives the children a huge advantage. Last but not least: Welec is the only school in Wenchi with boarding facilities.

Graduation Day, August 7th:

At the conclusion of the school year the annual Graduation Day was organized, where the entrance to the Primary- and the Junior high school is celebrated. This day is the day the school presents itself to the region and is very important for the name of the school. On the program (too) many speeches, singing and dancing and the graduation of the graduates in their ceremonial costume.

Summer classes in the Kids Palace:

At the request of some parents Kids Palace has decided to have extra classes during the summer holidays. About 45 parents were willing to pay extra, so the first two weeks of the summer holidays education continued as usual, but on a smaller scale. Parents get used to outsource their toddlers, so having them around at home or at work for a whole month is not always easy.

Rapid growth of Kids Palace:

The rush to the school (for 4 and 5 year olds) has already lead to a new (last) floor of the new building that started last year, allowing two more classes to be added. But this rush threatens the quality of this type of education by too large classes. There will be a waiting list.

The final exams; admission to Senior High School:

The results of the tests will be published not before September, too late to even mention them in this newsletter. The ten candidates are anxiously awaiting!

Candidates relax between exams along with their favourite teacher.
